## Health testing of the Golden Retriever

When you are seeking a puppy, you should ask a breeder if the parents have had these tests and ask to see the results when you visit.

DNA tests of both parents. (GR PRA 1& 2, ichthyosis, Degenerative Myelopathy, Neuronal Ceroid Lipofuscinosis (NCL)

NOTE: - DNA tests do not cover heart disease, hip and elbow dysplasia, common eye conditions of cataracts, entropion or glaucoma.
